

Nurses at the front lines of COVID-19

50%

of nurses report lacking adequate training to conduct COVID-19 testing; only 22% said they felt trained

26%

have made their own surgical mask

17%

have made their own N95 mask

14%

have made sanitizer, goggles and shields

Don't send me to the bedside with inadequate, recycled equipment to create some illusion [of protection]. It's unconscionable.

26%

identified a severe challenge isolating vulnerable populations

68% are worried about being short-staffed

More than **half**

report being short on or out of HEPA filters, PAPRs and hoods, N95 and surgical masks, full and partial face shields, isolation and disposable gowns, goggles and sanitizer
